The Federal Inspection Services (FIS) Renovation and Expansion 99% Draft Project Definition Manual (PDM), herewith made available, is based on programmatic and operational requirements ascertained through planning workshops with HAS and other stakeholders through May 2016. The Project Definition and associated Scope of Work is undergoing further refinement, and together with any requested changes by stakeholders will be published as an Addendum to the PDM. The Addendum will be made available to the selected Design Consultant and Construction Manager at Risk prior to contract negotiations. It is anticipated that these changes will, but not necessarily be limited to; scope prioritization, revised CBP process requirements, refinements as a result of passenger flow simulations, and alignment with the Program budget.
