CITY OF HOUSTON

Sylvester Turner
Mayor

HOUSTON AIRPORT SYSTEM

George Bush Intercontinental ~ William P. Hobby ~ Ellington Airport

Mario C. Diaz
Director of Aviation

October 26, 2023

SUBJECT: **Addendum No. 2**

REFERENCE: Invitation To Bid (ITB) for the IAH Term C Helix Ramp Bearing & Misc. Repairs at George Bush Intercontinental Airport; Solicitation No. H06-HELIXC-2024-006; Project No. 235A

To: All Prospective Bidders:

This Addendum is issued for the following reasons:

I. **Provide** a second site visit on **October 31, 2023, from 1 – 3 P.M.** Please meet at Terminal C Baggage Claim Information Desk at 1 P.M.

II. **Replace** the following pages with the attached document outlined below:

1. Pages 1-2 Division 01 Table of Contents - revised 10/17/23.
2. Pages 19-26 Document 000410A & 00410B Bid Form Part A & Bid Form Part B - revised 10/26/23.
3. Page 10 Section 01210 – Cash Allowances - revised 10/26/23.

III. **Add** the following pages with the attached documents as outlined below.

1. Section 07 18 16 – Deck Coating System.
2. Section 22 05 53 – Identification for Plumbing Piping and Equipment.
3. Sheet No. S5 – Sheet No. S36.
4. Sheet No. SK – 1.
5. Sheet No. SK – 2.
6. 3.5” Helical Piles and Anchors – Upset Connection Sheet.
7. New Construction Bracket Detail Sheet.
8. RAMJACK Detail Sheet.
9. Sheet No. A1-701B.
10. Sheet No. A1-601B.
11. Sheet No. SJ-001.
12. Sheet No. SJ-002.

IV. **To Respond to the following Questions.**

1. **Question:** Please provide as-built drawings, specifically for the bridges that require lifting and how they connect or interface with other structures.

   Response: The details required to repair structures are provided in the Contract Documents. The legacy drawings specific to the bridge are attached to this addendum (Sheets S5, S6, S7, S8, S9, S11, S12, S13, S26, S27, S28, S29, S30, S31, S32, S33, S34, S35, S36), and are now to be considered part of the Construction Documents for bidding purposes. A full set of existing Terminal C legacy drawings will be provided to the successful bidder.

2. **Question:** At the pre-bid meeting site visit, there appeared to be some new baggage handling equipment that interfered with the plan for shoring the levels above. Also, it was difficult to get a concise answer from the Engineering team on where exactly the shores were to be installed and which elements needed to be supported. Since the bidding contractors do not have access to the baggage level, we suggest that the Engineer locate and mark the location of the shoring foundations in the baggage handling area and invite the bidders back to reevaluate the conditions and conflicts.

   Response: The shoring system means and methods will be the Contractor's responsibility. The Contract Documents provide loading and design intent but do provide the final locations of foundations since those will be determined once the shores are designed by the shoring contractor's licensed engineer. The final shoring design requires approval from the Structural Engineer-of-Record during the submittal process. There has been on-going work in the United baggage room, which changed the conditions of the space after the release of the Contract Documents. A coordinated effort will be required to develop a shoring design that will work within those constraints. The Contractor will include an allowance of $300,000 for the shoring system.

3. **Question:** Sheet A5-702, Section 4 shows 1/2" dia eyebolts going through an existing wall to support the canopy. At the site visit a question was asked on what access the Contractors had to the back side of the wall to install the plate washers and nuts and the Engineering group did not know. Please clarify what access the Contractors have to the back side of the wall.

   Response: The Contractor will have access to the backside of the wall by removing a stucco soffit section. After installation of the canopy, the stucco soffit will be repaired to the original condition and all the vestibule soffit area will be painted.

4. **Question:** For the stair repairs, please provide bid items and quantities for: Repair Door from Binding, Replace Door with Like Kind, Repair or Patch Hole in Metal Riser, Repair or Patch Crack in Concrete Landing, Repair or Patch Crack in Masonry Unit, Areas of Excessive Rusting, etc. It was also stated at the pre-bid site visit that some of the steel elements of the staircases would need to be removed and replaced. Please provide details, bid items, and quantities for this work.

Response: Please refer to the revised Bid Form - Part B, Section 1.0 B, provided in this Addendum, for base unit price description to these items.

5. **Question:** Please provide bid items and quantities for concrete spall repairs (vertical, overhead, and horizontal).

   Response: Summary of bid quantities for repairs at the east helix bridges are indicated on General Note Sheet SF003. Please refer to the partial bridge plans for approximate location of repairs. Refer to "Concrete Repair Details" Sheet S502 for the bid quantities for repairs at the west helix structures. Refer to the revised Bid Form - Part B, Section 1.0 B, provided in this Addendum, for base unit price description to these items.

6. **Question:** Please provide bid items and quantities for concrete crack repairs (vertical, overhead, and horizontal).

   Response: Please refer to the response provided in Question #5.

7. **Question:** Please clarify what work areas the contractor will have for the following: concrete surfacing, plumbing (drains), staircase work, staircase enclosure and awnings, concrete repair, and bridge jacking.

   Response: For helix bridge repairs: Approximate work area is indicated for shoring placement in baggage room (see sheets SJ001 and SJ002). Refer to the traffic control plans for the upper-level work. Also refer to Part VIII General Sequence of Work on Sheet SF002 for additional notes critical to understanding constraints of the project. Refer to Sheets A1-201A, A1-201B, A1-301B, A1-401B. and A1-501B for laydown areas and areas of work. However, awarded Contractor will review and coordinate the final laydown areas and areas of work with HAS Parking Management, United Airlines, and HAS Operations Departments.

8. **Question:** Please further clarify the scope of work for the bridges on the Helix side of the bridges.

   Response: Details 3 and 4 on Sheet SF501 indicate bridge bearing condition at helix side of the bridge. Removal and replacement of portion of precast wall will be necessary to review the plates (assume 12 SF at each bridge beam for a total of 144 SF). Existing drawings refer to Detail 14 on Sheet S36 for this condition, which is same referenced for the garage side bearing condition. Complete replacement is not anticipated but unit pricing shall be provided in case damaged plates are discovered. After review, patch surfaces to match existing.

9. **Question:** Is there an estimated budget or construction cost range available for this project?

   Response: The project estimated budget is $6,000,000.

10. **Question:** Is there an anticipated start and completion date for when this work should begin and end?

    Response: The Contractor shall achieve a Substantial Completion date within two hundred and seventy days (270) after receiving a Notice to Proceed to commence the Work, which is anticipated at the start of the second quarter of 2024.

11. **Question:** We would like to know if is possible to make another site visit in order to be accompanied by some subcontractors.

    Response: Please refer to response provided for Romain Numeral 1.

12. **Question:** Abrasive Blasting: In areas where abrasive/sand blasting is required. Is the paint 100% removed?

    Response: Abrasive blasting will only be required to remove rusting from railing and stairs metal risers. All other railings and risers will be primed and painted per specs. Paint all stairs metal components: risers, railing, stringers, etc. Refer to the revised Bid Form – Part B, Section 1.0 B, provided in this Addendum, for base unit price description to these items.

13. **Question:** Doors Un-Hang/Re-Hang: Extra service. Provide Alternate.

    Response: No alternate will be provided for this Work. Door repairs will be done as part of the base bid. Please refer to the revised Bid Form – Part B, Section 1.0 B, provided in this Addendum, for base unit price description to these items.

14. **Question:** New Enclosures: Are these being painted?

    Response: No. Please provide clear anodized aluminum to all new enclosure frames.

15. **Question:** In the areas where rust is rotting through the metal can you please confirm the metal is going to be replaced?

    Response: Yes. Metal risers damaged beyond repair will be replaced per structural details on Sheet S11-500, Detail 4.

16. **Question:** The bid form does not have a contract pay item for concrete repairs, crack sealer, bearing plate repairs and painting steel girders that are shown in the plans on pages sf204-sf206. Please clarify.

    Response: The bid form includes all items listed on structural and architectural drawings. Please refer to the revised Bid Form – Part B, Section 1.0 B, provided in this Addendum, for base unit price description to these items.

17. **Question:** Please clarify the note on section 3 regarding bearing plate inspection? Are existing measurements and details available to price/bid new bearing plates? Will the contractor have to replace neoprene pads? If yes what will be the pad type to be replaced?

    Response: The question is referring to detail 3 on Sheet SF502. Please provide pricing for replacing new bearing plates and bearing pads to match existing. Bearing plate sizes are indicated in detail 3. The existing drawings describe the bearing plate as "Cosmic XL self-lubricating medium duty service Alloy B (Alloy 196). Minimum allowable bearing 2,000 PSI or equal. Bearing plates to receive machine finish of minimum 125 micro-in RMS in direction of movement or as otherwise indicated by the manufacturer". This note comes from detail 14 on existing drawing Sheet S36. Replace all slide plates. The new slide bearing shall be low-friction assembly of configuration to match that of the existing plates being replaced. Use Fluorogold Slide lates with stainless steel backer plates or approved equal. See attached cut sheet for Fluorogold slide plates.

18. **Question:** The pictures in the plans do not match what is on site for shoring plan, please clarify if baggage handling components will be removed to properly shore the parking structure?

    Response: United Airlines recently completed the replacement of all baggage systems in the Terminal C bag room, so conditions have changed. The devices are all new and in operation so it is not likely that any of the components can be removed. Please refer to the response provided in Question #2 for additional information.

19. **Question:** On sheet sg502 the expansion joint detail. Please clarify the type of steel reinforced anchor blocks spec. Will this be poured in place concrete?

    Response: If this question is referring to detail 5 on Sheet SF502. The note is incorrect, anchor blocks shall be EPDM rubber as provided by WABO basis of design product. Expansion joint replacement will mostly occur at existing concrete locations, but new pour strips are required at level 6 so both conditions must be accommodated. Selected EJ devices must be compatible and work with all existing conditions encountered so similar, but alternative WABO products may be required. Review all existing conditions with WABO (or other approved manufacturer) before purchasing expansion joint devices and anchors.

20. **Question:** Which surfaces receive "Application of high-solids, fluid-applied, polyurethane, waterproofing, traffic-bearing, membrane deck coating system."

    Response: Please refer to the revised Bid Form - Part B, Section 1.0 B, item 1 provided in this Addendum, for base unit price description to this item.

21. **Question:** Do you happen to know if there is a geotechnical report, complete with soil borings, available for this project?

    Response: A geotechnical report for the United EBS project is available for reference if needed, but what may be more helpful is a report from helical pile installation that occurred within the baggage room in 2022. See attachment.

When issued, Addendum shall automatically become part of the solicitation documents and shall supersede any previous specification(s) and/or provision(s) in conflict with the Addendum. Addendum will be incorporated into the Agreement as applicable. It is the responsibility of the bidder(s) to ensure that it has obtained all such letter(s). By submitting a bid on this project, bidder(s) shall be deemed to have received all Addendum and to have incorporated them into their bid.

If further clarification is needed regarding this solicitation, please contact Senior Procurement Specialist, David Martinez via email at david.martinez@houstontx.gov.

Document 00410A

BID FORM – PART A

To: **The Honorable Mayor and City Council of the City of Houston**
City Hall Annex
900 Bagby Street
Houston, Texas 77002

Project: IAH TERMINAL C HELIX RAMP BEARING & MISC REPAIRS
Project No.: 235A
Bidder: _____
(Print or type full name of business entity, such as corporation, LLC, etc)

1.0 OFFER

A. Total Bid Price: Having examined the Project location and all matters referred to in Bid Documents for the Project, we, the undersigned, offer to enter into a Contract to perform the Work for the Total Bid Price shown on the signature page of this Document

B. Security Deposit: Included with the Bid is a Security Deposit in the amount of 10 percent of the Total Bid Price subject to terms described in Document 00200 – Instructions to Bidders.

C. Period for Bid Acceptance: This offer is open to acceptance and is irrevocable for 180 days from Bid Date. That period may be extended by mutual written agreement of the City and Bidder.

D. Addenda: All Addenda have been received. Modifications to Bid Documents have been considered and all related costs are included in the Total Bid Price.

E. Bid Supplements: The following documents are attached:

[X] Security Deposit *(as defined in Document 00200 – Instructions to Bidders)*
[X] Document 00450 - Bidder's Statement of MWSBE Status
[X] Document 00454 - Affidavit of Non-interest
[X] Document 00455 - Ownership Information Form
[ ] Document 00456 - Bidder's Certificate of Compliance with Buy American Program *(required for AIP funded project)*
[X] Document 00457 – Conflicts of Interest Questionnaire (CIQ)
[ ] Document 00458 - Bidder's Certificate Regarding Foreign Trade Restriction *(required for AIP funded project)*
[ ] Document 00459 - Contractor's Statement Regarding Previous Contracts Subject to EEO *(required for AIP funded project)*
[X] Document 00460 – Pay or Play Acknowledgement Form (POP 1-A)
[X] Document 00461 – Hire Houston First Affidavit
[X] Document 00470 – Bidder's MWSBE Participation Plan *(required unless no MWSBE participation goal is provided in Document 00800* (the "Goal"))*.*
[ ] Document 00470D - Bidder's DBE Participation Plan *(required for AIP funded project)*

[ ] Document 00471 – Bidder's Record of Good Faith Efforts *(required if the goal in Bidder's Participation Plan–Document 00470 is lower than the Goal).*
[ ] Document 00472 – Bidder's Goal Deviation Request *(required if the goal in Bidder's Participation Plan–Document 00470 is lower than the Goal).*
[X] Document 00480 – Form SCM-1 Reference Verification
[X] Document 00481 – Non-Collusion Statement
[X] Document 00842 – Letter of Intent
[ ] Others as listed: _____

2.0 CONTRACT TIME

A. If offer is accepted, Contractor shall achieve Date of Substantial Completion within Two Hundred Seventy (270) days after Date of Commencement of the Work, subject to adjustments of Contract Time as provided in the Contract.

Document 00410B

BID FORM – PART B

1.0 TOTAL BID PRICE HAS BEEN CALCULATED BY BIDDER, USING THE FOLLOWING COMPONENT PRICES AND PROCESS (PRINT OR TYPE NUMERICAL AMOUNTS):

A. STIPULATED PRICE: $_____

(Stipulated Price equals the Total Bid Price minus Base Unit Prices (B), Extra Unit Prices (C), Cash Allowances (D) and All Alternates (E), if any)

B. BASE UNIT PRICE TABLE:

Item No.	Spec/ Sheet Ref.	Base Unit Short Title	Unit of Measure	Estimated Quantity	Unit Price (this column controls)	Total in figures
1	071816	Application of high-solids, fluid-applied, polyurethane, waterproofing, traffic-bearing, membrane deck coating system.	SF	76,544	_____ (1)	
2	079500	Provide watertight Heavy Duty Expansion Control System that is capable of accommodating HS-20 loading requirements.	LF		_____ (1)	
3	084113	Trifab® VersaGlaze® 451 Framing System. Price to include any demolition of handrails, floating of sidewalk to achieve drainage away from enclosure, roofing, structural elements, doors, hardware for stairs 4, 5, 6, 7, 8, 9,10 and 11.	LS	1	_____ (1)	
4	099113-7	4-inch-wide Flat Yellow Exterior Traffic Striping Paint	LF	3,492	_____ (1)	
5	030105	Prepare and fill concrete surface on the north and south side six floor of the garage to slope away from the garage edge.	SF	5,920	_____ (1)	
6		High pressure washing and landings, underside of stairs, guardrails, and handrails. Surface preparation of substrates as required for acceptance of paint, including cleaning, small crack repair, patching, caulking, priming, and making good surfaces and areas.	SF	3,776,959	_____ (1)	

7		Install foundation armor sx5000 penetrating sealer clear matte transparent concrete sealer ready-to-use on stair treads and landings after hp washing	SF	1,512,000	____ (1)	
8		On surfaces prepared for paint, apply a test patch of the recommended coating system, on the handrail, riser, or stringer, covering at least 2 to 3 square feet, or 36" section of handrail, and allowed to dry one week before testing adhesion per ASTM D3359. Perform 3 tests minimum in each of the 14 staircases.	EA	42	____ (1)	
9		Mobilization	LS		____ (1)	
10	01505	Temporary Facilities	LS		____ (1)	
11	01450	Contractor Quality Control (material testing, inspections, etc.) Do not include, in this number, Item 8 above.	LS		____ (1)	
12		Repair hollow metal door from binding condition	EA	20	____ (1)	
13		Replace hollow metal door with like kind.	EA	3		
14		Replace stair's metal riser, 6-inch-high x 6-foot-wide, and prep to paint.	EA	25		
15		Patch crack in stair concrete landing	LF	300		
16		Repair of patch crack in concrete masonry unit	SF	100		
17		Abrasive blasting of stair's railing system, nosing, stringer, etc., to remove rusted sections and prepare railing for paint application.	LF	2,000		
18		Abrasive blasting of stair's hollow metal riser, 6-inch-high x 6-feet-wide and prepare for paint application.	EA	200		
19	S502	Level 4 concrete repair (with exposed rebar)	SF	40		
20	S502	Level 4 concrete repair (with no exposed rebar)	SF	40		
21	S502	Level 4 crack sealer (hairline cracks)	LF	40		

22	S502	Level 4 crack epoxy injection	LF	10		
23	S502	Level 4 Concrete corbels	EA	4		
24	S502	Level 4 steel bearing plate and neoprene pad replacement	EA	4		
25	S502	Level 5 concrete repair (with exposed rebar)	SF	10		
26	S502	Level 5 concrete repair (with no exposed rebar)	SF	30		
27	S502	Level 5 crack sealer (hairline cracks)	LF	250		
28	S502	Level 5 crack epoxy injection	LF	10		
29	S502	Level 5 Concrete corbels	EA	4		
30	S502	Level 5 steel bearing plate and neoprene pad replacement	EA	4		
31	S502	Level 6 concrete repair (with exposed rebar)	SF	30		
32	S502	Level 6 concrete repair (with no exposed rebar)	SF	10		
33	S502	Level 6 crack sealer (hairline cracks)	LF	10		
34	S502	Level 6 crack epoxy injection	LF	40		
35	S502	Level 6 Concrete corbels	EA	4		
36	S502	Level 6 steel bearing plate and neoprene pad replacement	EA	4		
37		Cut out and replace precast panel at helix side of bridge, 4 at each level.	EA	12		
38		Fluorgold Sliding Plates	EA	24		
39	XT Series Plans	Traffic Control Plan	LS	1		
40	P Series Plans	Plumbing installation to include 96 deck drains, 6,000 LF of storm piping, plumbing hangers and supports, and connectors and fittings.	LS	1		
TOTAL BASE UNIT PRICES						$_____

REST OF PAGE INTENTIONALLY LEFT BLANK

C. EXTRA UNIT PRICE TABLE:

Item No.	Spec Ref.	Extra Unit Short Title	Unit of Measure	Estimated Quantity	Unit Price (this column controls)	Total in figures
1		N/A

F. TOTAL BID PRICE: **$**_____
(Add Totals for Stipulated Price (A), Base Unit Price, Extra Unit Price, Cash Allowance, and All Alternates, if any)

2.0 SIGNATURES: By signing this Document, I agree that I have received and reviewed all Addenda and considered all costs associated with the Addenda in calculating the Total Bid Price.

Bidder: _____
(Print or type full name of your proprietorship, partnership, corporation, or joint venture.*)

**By: _____
Signature Date

Name: _____
(Print or type name) Title

Address: _____
(Mailing)

_____
(Street, if different)

Telephone and Fax Number: _____
(Print or type numbers)

* If Bid is a joint venture, add additional Bid Form signature sheets for each member of the joint venture.

** Bidder certifies that the only person or parties interested in this offer as principals are those named above. Bidder has not directly or indirectly entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding.

Note: This document constitutes a government record, as defined by § 37.01 of the Texas Penal Code. Submission of a false government record is punishable as provided in § 37.10 of the Texas Penal Code.

Footnotes for Tables B through E:
(1) Fixed Unit Price determined prior to Bid. Cannot be adjusted by the Bidder.
(2) Minimum Bid Price determined prior to Bid. Can be increased by the Bidder, but not decreased, by crossing out the Minimum and inserting revised price on the line above. **Cannot** be decreased by the Bidder.
(3) Maximum Bid Price determined prior to Bid. Can be decreased by the Bidder, but not increased, by crossing out the Maximum and inserting revised price on the line above. A Bid that increases the Maximum Bid Price may be found non-conforming and non-responsive. **Cannot** be increased by the Bidder.
(4) Fixed Range Bid Price determined prior to Bid. Unit Price can be adjusted by Bidder to any amount within the range defined by crossing out prices noted and noting revised price on the line above.

SECTION 01210
CASH ALLOWANCES

PART 1 GENERAL

1.01 SECTION INCLUDES

A. City's allowances allocated to the items of work listed or as directed.

B. See Document 00700 - General Conditions, Paragraph 3.11 for costs included and excluded from cash allowance values listed in 1.02 below.

C. Follow Section 01255 - Modification Procedures for processing allowance expenditures. Cash Allowance sums remaining at Final Completion belong to the City, creditable by Change Order.

1.02 SCHEDULE OF CASH ALLOWANCES (TOTAL $6,000.00)

A. Allowance Item 1 - Building Permit: For obtaining the Building Permit from City of Houston, **$ 6,000.00**.

B. Allowance Item 2 – Shoring System: Provide shoring system to include all work to be provided by the shoring subcontractor for temporary barriers, scaffolding, pipe shores, beams, protection systems, cost for engineering (design & documentation) associated with the design and installation of the shoring system, shoring drawings, helical piles and concrete pads foundation, and all components necessary to provide a complete shoring system with capacity to jack up a single level of bridge to minimum height needed to replace steel bearing plates, **$ 300,000.00**.

PART 2 PRODUCTS (NOT USED)

PART 3 EXECUTION (NOT USED)

END OF SECTION

REVISED 10/26/23.

SECTION 07 18 16
DECK COATING SYSTEM

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
1. Application of high-solids, fluid-applied, polyurethane, waterproofing, traffic-bearing, membrane deck coating system.

B. Related Sections:
1. Section 033053 - Cast-in-Place Concrete.

1.2 SUBMITTALS

A. Comply with Section 01330.

B. Product Data: Submit manufacturer's technical data sheets.

C. Submit list of project references as documented in this specification under Quality Assurance Article. Include contact name and phone number of the person charged with oversight of each project.

D. Quality Control Submittals:
1. Provide protection plan of surrounding areas and non-work surfaces.

1.3 QUALITY ASSURANCE

A. Comply with Section 01450.

B. Qualifications:
1. Manufacturer Qualifications: Company with minimum 15 years of experience in manufacturing of specified products and system.
2. Manufacturer Qualifications: Company shall be ISO 9001:2015 Certified.
3. Applicator Qualifications: Company with minimum of 5 years' experience in application of specified products and system on projects of similar size and scope and is acceptable to product manufacturer.
   a. Successful completion of a minimum of 5 projects of similar size and complexity to specified work.

C. Field Sample:
1. Install field sample at project site or other pre-selected area of building, as directed by architect/engineer.
2. Provide mock-up of at least 100 square feet (9.3 m^2) to include surface profile, sealant joint, crack, flashing and juncture details and allow for evaluation of slip resistance and appearance.
3. Apply material in accordance with manufacturer's written application instructions.
4. Manufacturer's representative or designated representative will review technical aspects; surface preparation, application and workmanship.
5. Field sample will be standard for judging workmanship on remainder of project.
6. Maintain field sample during construction for workmanship comparison.
7. Do not alter, move or destroy field sample until work is completed and approved by architect/engineer.

8. Obtain architect/engineer written approval of field sample before start of material application, including approval of aesthetics, color, texture and appearance.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Comply with manufacturer's ordering instructions and lead-time requirements to avoid construction delays.

B. Deliver materials in manufacturer's original, unopened, undamaged containers with identification labels intact.

C. Store materials in unopened packaging in clean, dry area protected from sunlight.

1.5 PROJECT CONDITIONS

A. Environmental Requirements:
1. Minimum Application Temperature: 40 degrees F (4 degrees C).
2. Do not apply in rain or when rain is expected within 24 hours.
3. Do not apply above 90 degrees F (32 degrees C).

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Subject to compliance with requirements, provide products from the following manufacturer as basis of design:
BASF Corporation Construction Chemicals
889 Valley Park Drive
Shakopee, MN 55379 USA
Customer Service: 800-433-9517
Technical Service: 800-243-6739
Direct Phone: 952-496-6000
Website: www.master-builders-solutions.basf.us

B. Other approved manufacturers:
1. Sika: Sikalastic 720/745 Al Heavy Vehicular Traffic System
Sika Corporation
201 Lito Avenue
202 Lyndhurst, NJ 07071
Phone: +1-800-933-7452
2. Neogard: Auto-Gard FC Heavy Duty System
Neogard
2728 Empire Central
Dallas, TX 75235
Phone: 1-833-443-6735

C. Specifications and drawings are based on manufacturer's proprietary literature from BASF. Other manufacturers shall comply with minimum levels of material, color selection and detailing indicated in specifications or on drawings. Architect will be sole judge of appropriateness of substitutions.

2.2 MATERIALS

A. High-solids, fluid-applied, polyurethane, waterproofing, traffic-bearing, membrane deck coating system.

1. Acceptable Product: MasterSeal Traffic 2500 Deck Coating System (formerly Conipur II Deck Coating System) by BASF.
   a. Primer: MasterSeal P 255 (formerly Conipur 78 Primer.) two-component, polyurethane-based adhesive primer.
   b. Base coat: MasterSeal M 265 (formerly Conipur 265-Z Base Coat.) two-component, fast-curing, polyurethane base coat.
   c. Top Coat: MasterSeal TC 275 (formerly Conipur 275 Top Coat): two-component, fast-curing, aromatic polyurethane top coat.
   d. Aliphatic Top Coat: MasterSeal TC 295 (formerly Conipur 295 Top Coat): two-component, aliphatic, 100 percent solids, polyurethane, waterproofing top coat.
   e. Aggregate: MasterSeal 941DR: aggregate free of respirable crystalline silica

B. Compliances:
   1. ASTM C 957
   2. CSA S413

C. Performance Requirements: Provide materials complying with the following requirements:
   1. Crack Bridging, Base Coat, ASTM C957: Passes.
   2. Adhesion Peel, Primer and Base Coat, ASTM C957.
      a. Plywood: 25 pli.
      b. Concrete: 14 pli.
   3. Tensile Strength, ASTM D412:
      a. Base Coat: 3,400 psi (23.4 MPa)
      b. Top Coat: 3,000 psi (20.7 MPa).
      c. Aliphatic Top Coat: pre-pigmented 3,400 psi (23.4 MPa), tint base 3,000 psi (20.7 MPa).
   4. Elongation, ASTM D412:
      a. Base Coat: 900 percent.
      b. Top Coat: 30 percent.
      c. Aliphatic Top Coat: pre-pigmented 340 percent, tint base 390 percent.
   5. Hardness, ASTM D2240, Shore A:
      a. Top Coat: 70.
      b. Aliphatic Top Coat: pre-pigmented 94, tint base 90.
   6. Taber Abrasion Resistance, ASTM D4060, CS-17 Wheel, 1,000 g load, 1,000 cycles:
      a. Primer/Base Coat/Top Coat: 100 mg.
      b. Primer/Base Coat/Intermediate Top Coat/Aliphatic Top Coat: 47 mg.
   7. Solids Content:
      a. Primer: 99 percent.
      b. Base Coat: 99 percent.
      c. Top Coat: 99 percent.
      d. Aliphatic Top Coat: 91 percent.
   8. VOC Content:
      a. Primer:
         1) Part A: 0.08 lbs per gal (10 g/L), less water and exempt solvents.
         2) Part B: 0.08 lbs per gal (10 g/L), less water and exempt solvents.
      b. Base Coat:
         1) Part A: 0.03 lbs per gal (4 g/L), less water and exempt solvents.
         2) Part B: 0.04 lbs per gal (5 g/L), less water and exempt solvents.
      c. Top Coat:
         1) Part A: 0.59 lbs per gal (71 g/L), less water and exempt solvents.
         2) Part B: 0.11 lbs per gal (13 g/L), less water and exempt solvents.
      d. Aliphatic Top Coat:

1) Part A: 20.1 g/L, less water and exempt solvents
2) Part B: 173.8 g/L, less water and exempt solvents

D. Color:

1. Black (only available with TC 275).
2. Charcoal.
3. Gray.
4. Tintbase (only available with TC 295).

E. Accessories:

1. Aggregate: MasterSeal 941DR.
2. Sealant Primer: MasterSeal P 173 (formerly Sonneborn Primer 733).
3. Sealant: MasterSeal SL 2 or MasterSeal CR 195 (formerly Sonneborn SL-2 or Sonneborn Ultra).
4. Deep Joint Sealant: MasterSeal SL 2 or MasterSeal NP 2 (formerly Sonneborn SL-2 or Sonneborn NP-2).
5. Plywood Joint Sealant: MasterSeal NP 1 or MasterSeal NP 2 (formerly Sonneborn NP-1 or Sonneborn NP-2).
6. Reinforcing Fabric: MasterSeal 995 (formerly Sonoshield Reinforcing Fabric).

PART 3 - EXECUTION

3.1 EXAMINATION

A. Comply with Section [01 70 00] [__ __ __].

3.2 SURFACE PREPARATION

A. Protection: Protect adjacent work areas and finish surfaces from damage during deck coating system application.

B. Prepare surface in accordance with manufacturer's instructions.

C. Concrete:

1. Minimum Compressive Strength: 3,000 psi (21 MPa).
2. Cure concrete for a minimum of 28 days.
3. Ensure concrete is structurally sound, clean and dry in accordance with ASTM D4263.
4. Repair voids and delaminated areas.
5. Shot blast concrete to remove dirt, dust, grease, oil, coatings, laitance and other surface contamination and to provide profile for proper adhesion.
6. Profile: Minimum of ICRI CSP-3 (approximately 80 to 100-grit sandpaper).
7. Prestripe and prepare cracks, joints and detail work in accordance with manufacturer's instructions.

3.3 MIXING

A. Mix material components in accordance with manufacturer's instructions.

B. Precondition material components to a temperature of 70 degrees F (21 degrees C) before mixing.

3.4 APPLICATION – GENERAL

A. Apply deck coating system in accordance with manufacturer's instructions.

B. Do not apply deck coating system to damp, wet or contaminated surfaces.

3.5 APPLICATION – EXTRA-HEAVY TRAFFIC

A. Primer: Apply 4 wet mils (0.1 mm).

B. Base Coat: Apply 25 wet mils (0.5 mm). Immediately backroll to level material. Allow base coat to cure 3 to 4 hours.

C. Intermediate Coat: Apply 20 to 25 wet mils (0.5 to 0.6 mm). Immediately backroll to level material.

D. Aggregate: Immediately broadcast aggregate to refusal into wet intermediate coat. Allow curing time of 3 to 4 hours.

E. Remove excess aggregate.

F. Top Coat: Apply 15 wet mils (0.40 mm). Immediately backroll to level material.

G. Additional Slip Resistance: Immediately broadcast aggregate at rate of 3 to 5 lbs per 100 sq ft (0.15 to 0.25 kg/m^2). Lightly backroll into top coat.

3.6 PROTECTION

A. Pedestrian Traffic: Allow minimum curing time of 4 hours before allowing pedestrian traffic onto deck coating system.

B. Vehicular Traffic: Allow minimum curing time of 24 hours before allowing vehicular traffic onto deck coating system.

C. Protect completed deck coating system from damage and staining during construction.

END OF SECTION

SECTION 22 0553 - IDENTIFICATION FOR PLUMBING PIPING AND EQUIPMENT

PART 1 GENERAL

1.1 REFERENCE STANDARDS

A. ASME A13.1 - Scheme for the Identification of Piping Systems 2020.

1.2 SUBMITTALS

A. Product Data: Provide manufacturers catalog literature for each product required.

PART 2 PRODUCTS

2.1 IDENTIFICATION APPLICATIONS

A. Piping: Pipe markers.

2.2 PIPE MARKERS

A. Comply with ASME A13.1.

B. Plastic Pipe Markers: Factory fabricated, flexible, semi- rigid plastic, preformed to fit around pipe or pipe covering; minimum information indicating flow direction arrow and identification of fluid being conveyed.

C. Plastic Tape Pipe Markers: Flexible, vinyl film tape with pressure sensitive adhesive backing and printed markings.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install plastic nameplates with corrosive-resistant mechanical fasteners, or adhesive. Apply with sufficient adhesive to ensure permanent adhesion and seal with clear lacquer.

B. Install tags with corrosion resistant chain.

C. Install plastic pipe markers in accordance with manufacturer's instructions.

D. Use tags on piping 3/4 inch diameter and smaller.

1. Identify service, flow direction, and pressure.

2. Install in clear view and align with axis of piping.

3. Locate identification not to exceed 20 feet on straight runs including risers and drops, adjacent to each valve and Tee, at each side of penetration of structure or enclosure, and at each obstruction.

E. Locate ceiling tacks to locate valves or dampers above lay-in panel ceilings. Locate in corner of panel closest to equipment.

MAIN TERMINAL BUILDING FOUNDATION PLAN

SCALE: 1/16" = 1'-0" (7)

1. DESIGN LOADS:
   A. WALL LATERAL PRESURE = 65 PSF
   B. LOWER LEVEL LIVE LOAD = 100 PSF
   C. LOWER LEVEL LOAD @ TRAIN LOCATION = 200 PSF

2. CONCRETE:
   A. HARDROCK CONCRETE IN THE FOLLOWING STRUCTURES SHALL HAVE A MINIMUM COMPRESSIVE STRENGTH AT 28 DAYS.

      COLUMN FOOTING (HARD ROCK) = 3000 PSI
      LOWER LEVEL FLOOR (HARD ROCK) = 4000 PSI
      LOWER LEVEL WALLS (HARD ROCK) = 4000 PSI
      SEAL SLAB (HARD ROCK) = 2500 PSI
   B. CONCRETE SHALL BE MIXED, TRANSPORTED, PLACED, COMPACTED AND CURED IN STRICT ACCORDANCE WITH ALL PERTINENT ACI SPECIFICATIONS AND STANDARDS, INCLUDING "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE" ACI 318-71.

3. REINFORCING STEEL:
   A. ALL REINFORCING STEEL SHALL BE ASTM A615, GRADE 60. DESIGN, FABRICATE AND ERECT IN STRICT ACCORDANCE WITH ACI AND CR.S.I. STANDARDS AND SPECIFICATIONS.

4. STEEL:
   A. ALL STEEL SHALL BE ASTM A36. DESIGN, FABRICATE AND ERECT IN STRICT ACCORDANCE WITH SPECIFICATIONS, STANDARDS AND RECOMMENDATIONS OF AMERICAN INSTITUTE OF STEEL CONSTRUCTION (AISC).
   B. FIELD CONNECTIONS SHALL BE EQUIVALENT TO STANDARD BOLTED CONNECTIONS USING 3/4" A.S.T.M. A307 BOLTS UNLESS OTHERWISE SHOWN.
   C. WELDS AND WELDING SHALL BE IN STRICT ACCORDANCE WITH SPECIFICATIONS, STANDARDS AND RECOMMENDATIONS OF A.I.S.C. AND THE AMERICAN WELDING SOCIETY.
   D. ALL HARDWARE EXPOSED STRUCTURAL STEEL, BOLTS, SHALL BE HOT DIP GALVANIZED AFTER FABRICATION, UNLESS OTHERWISE NOTED.

5. JOINTS:
   A. ALL EXPANSION JOINTS, CONSTRUCTION JOINTS SHALL HAVE A CONTINUOUS PVC WATERSTOP TO FORM A WATERTIGHT STRUCTURE.

6. STRUCTURAL REQUIREMENTS:
   A. ELEVATOR PITS AND ESCALATOR PIT DIMENSIONS AS SHOWN ARE FOR BID PURPOSES ONLY. COORDINATE PIT DIMENSIONS & LOCATE ANCHOR BOLTS WITH APPROVED CERTIFIED VENDOR DRAWINGS.
   B. VERIFY ALL DIMENSIONS AND CONDITIONS IN THE FIELD BEFORE COMMENCING WORK. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO REPORT ANY DISCREPANCIES TO OWNER IN A TIMELY MANNER.
   C. BUILDING CODE, CITY OF HOUSTON, SHALL BE USED AS APPLICABLE.
   D. PADS FOR MECHANICAL EQUIPMENT (SEE MECHANICAL SHEET M12 FOR LOCATION) SHALL BE 4" MIN. ABOVE FINISH FLOOR WITH #6x#6, 10x10 WWM AT MID HEIGHT OF PAD. COORDINATE ANCHOR BOLT LOCATIONS AND PAD SIZE WITH EQUIPMENT SUBMITTED BY MANUFACTURER.

7. FOUNDATION:
   A. BACKFILL FOR LOWER LEVEL AND TUNNEL WALLS SHALL BE COHESIVE SOILS HAVING A LIQUID LIMIT OF 55 OR LESS AND P.I. 5 TO 20.
   B. IF OVER-EXCAVATION IS REQUIRED AND THE FOOTINGS FORMED, THE SPACE BETWEEN THE EDGE OF FOOTING AND NATURAL SOIL SHOULD BE BACKFILLED WITH COMPACTED CEMENT STABILIZED SAND OR LEAN CONCRETE UP TO THE LEVEL OF THE TOP OF FOOTINGS.
   C. DURING CONSTRUCTION, GROUNDWATER LEVEL MUST BE REDUCED TO AT LEAST THREE FEET BELOW EXPOSED EXCAVATION SURFACES IN ORDER TO MAINTAIN THE FOUNDATION SOILS IN DRY AND STABLE CONDITION.
   D. ALL FILL SHALL BE SELECT MATERIAL, FREE OF EXCESS SILT AND HAVING A P.I. OF BETWEEN 10 AND 20. THE SANDY CLAY MATERIAL REMOVED FROM EXCAVATION SHALL BE ADEQUATE. THE BACKFILL SHALL BE PLACED AND COMPACTED TO 95 PERCENT OF STANDARD PROCTOR (ASTM D-698) AT APPROXIMATE OPTIMUM MOISTURE CONTENT.

3-77
7. E. ALL FOOTINGS WHICH CANNOT BE EXCAVATED TO FINAL GRADE AND POURED THE SAME DAY SHALL HAVE A 3-INCH SEAL SLAB (3,000 PSI CONCRETE) BELOW THE BOTTOM ELEVATION.

8. REFERENCE DRAWINGS:
   A. REFER TO A.M.E.P SHEETS FOR SIZES AND LOCATION OF SLEEVED PENETRATIONS THROUGH SLAB.
   B. STRUCTURAL:

1.) INTER-TERMINAL TUNNEL	S1 THRU S4
2.) TUG TUNNEL	S5, S6
3.) COLUMN & FOOTING SCHEDULE	S14 THRU S16
4.) MISC. STRUCTURAL DWGS.	S8, S19, S20 & S32

9. LOCATE MECH. INSERTS AS INSTRUCTED BY DIVISION 15, FURNISHED BY DIVISION 15 AND INSTALLED BY DIVISION 03. OF THE SPECIFICATIONS.

10. TUNNEL FLOOR AT TRAIN LOCATION SHALL BE GROUND TO THE TOLERANCE OF -1/8" OR +0'-0" IN 10'-0" LENGTH.

11. SLOPE ALL FLOOR SLABS 1/2" TO FLOOR DRAINS.

SHEET OF

DRAWING NO. 6950-186

NOTES:

1. DESIGN LIVELOAD 50 PSF
2. CONCRETE:
   A. CONCRETE FOR COLUMNS SHOWN IS TO BE 4000 PSI HARDROCK CONCRETE.
   B. CONCRETE FOR STRUCTURAL SLABS, BEAMS AND GIRDERS IS TO BE 4000 PSI LIGHTWEIGHT CONCRETE USING TYPE K CEMENT.
   C. CONCRETE FOR TOPPING SLABS IS TO BE 3000 PSI LIGHTWEIGHT CONCRETE.
3. REINFORCING STEEL:
   SLAB, BEAM AND GIRDER STEEL —— f_y = 60,000 PSI
   COLUMN STEEL f_y = 60,000 PSI
4. REFER TO SHEET S14 FOR COLUMN SCHEDULE OF COLUMNS SHOWN BETWEEN ELEVATIONS 160'-7" TO 177'-10"
5. REFER TO SHEET S-18 FOR BEAM DETAILS.
6. REFER TO SHEET S-15 FOR SLAB SCHEDULE
7. REFER TO ARCHITECTURAL PLANS FOR DETAILS OF PRECAST PANEL ATTACHMENT.
8. REFER TO MECHANICAL & PLUMBING PLANS FOR PENETRATIONS THROUGH THE FLOOR SYSTEM.
9. ELEVATOR OPENING DIMENSIONS SHOWN FOR BID PURPOSES ONLY. COORDINATE OPENING DIMENSIONS WITH DIMENSIONS OF ELEVATORS FURNISHED.
10. ALL STRUCTURAL STEEL NOT SHOWN ON THESE PLANS, BUT REQUIRED TO SUCCESSFULLY COMPLETE THE WORK OF THE ELEVATOR CONTRACT, SUCH AS SHEAVE BEAMS COUNTERWEIGHT SUPPORTS, AND ANY OTHER ITEM SHALL BE FURNISHED BY THE ELEVATOR SUB CONTRACTOR.

LIGHTWEIGHT CONCRETE TOPPING SLAB OVER WATERPROOF MEMBRANE
ELEVATION TOP OF TOPPING SLAB VARIES REFER TO ARCHITECTURAL PLANS FOR ELEV.
STRUCTURAL SYSTEM IS 6" POST-TENSIONED CONCRETE SLAB WITH BEAMS AND GIRDERS
ELEVATION TOP OF STRUCTURAL SLAB
160'-7"

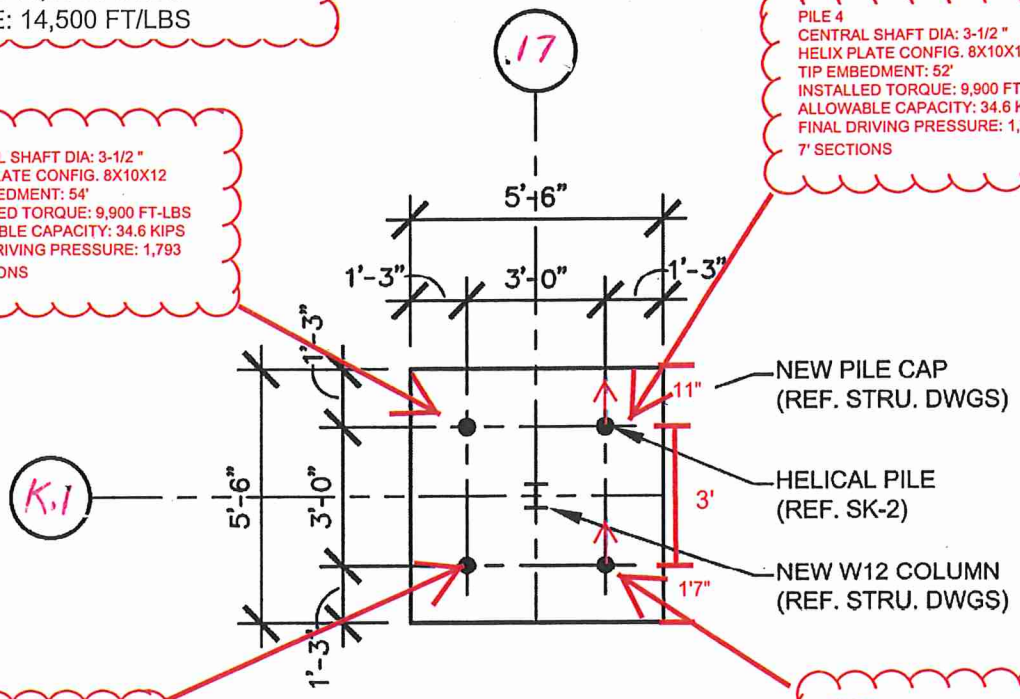
HELICAL PILE INFO

INSTALL DATE: 11/08/2022
PILE MANUFACTURER: RAMJACK
CONTRACTOR: RAMJACK
EQ I.D: TORQUE CELL 63800010
MIN. TORQUE 11,500 FT/LBS
MAX TORQUE: 14,500 FT/LBS

PILE 1
CENTRAL SHAFT DIA: 3-1/2 "
HELIX PLATE CONFIG. 8X10X12
TIP EMBEDMENT: 54'
INSTALLED TORQUE: 9,900 FT-LBS
ALLOWABLE CAPACITY: 34.6 KIPS
FINAL DRIVING PRESSURE: 1,793
7' SECTIONS

PILE 4
CENTRAL SHAFT DIA: 3-1/2 "
HELIX PLATE CONFIG. 8X10X12
TIP EMBEDMENT: 52'
INSTALLED TORQUE: 9,900 FT-LBS
ALLOWABLE CAPACITY: 34.6 KIPS
FINAL DRIVING PRESSURE: 1,793 PSI
7' SECTIONS



PILE 2
CENTRAL SHAFT DIA: 3-1/2 "
HELIX PLATE CONFIG. 8X10X12
TIP EMBEDMENT: 51'
INSTALLED TORQUE: 10,000 FT-LBS
ALLOWABLE CAPACITY: 35 KIPS
FINAL DRIVING PRESSURE: 1,900 PSI
5' SECTIONS

PILE 3
CENTRAL SHAFT DIA: 3-1/2 "
HELIX PLATE CONFIG. 8X10X12
TIP EMBEDMENT: 52'
INSTALLED TORQUE: 10,000 FT-LBS
ALLOWABLE CAPACITY: 35 KIPS
FINAL DRIVING PRESSURE: 1900 PSI
7' SECTIONS

PLAN NOTES

1. HELICAL PILES TO HAVE A MINIMUM WORKING CAPACITY OF 40 KIPS.
2. REFERENCE SK-2 FOR HELICAL PILE DETAILS.

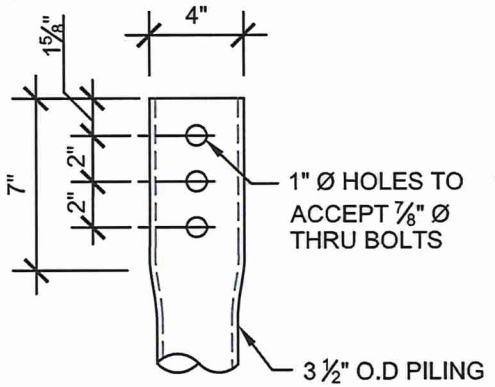
MECHANICAL TORQUE RATING - 14,510 FT-LB
ULTIMATE CAPACITY (COMP. & TENS.) - 101.6 KIP *
ALLOWABLE CAPACITY (COMP. & TENS.) - 50.8 KIP *
*BASED ON A TORQUE FACTOR (Kt) = 7



CONNECTION DETAIL

NOTES:

1. POLYETHYLENE POLYMER THERMOPLASTIC COATING PER ICC-ES AC 228. (GALVANIZED AND UNCOATED PILES AVAILABLE UPON REQUEST)
2. LEAD AND EXTENSION SECTION LENGTHS ARE NOMINAL.
3. SHAFT MATERIAL IS 3 ½" O.D., 0.254" WALL, MINIMUM Fy=65 KSI AND Fu=76 KSI, ASTM - A500.
4. HELIX BLADE MATERIAL IS HOT ROLLED, MINIMUM Fy=50 KSI AND Fu=80 KSI CARBON STEEL. PLATE THICKNESS IS AVAILABLE IN ⅜" AND ½" THICKNESSES.
5. NOMINAL SPACING BETWEEN HELICAL PLATES IS THREE TIMES THE DIAMETER OF THE LOWEST HELIX.
6. MANUFACTURER SHALL BE ISO 9001:2015 CERTIFIED.
7. ALL WELDING IS TO BE DONE BY WELDERS CERTIFIED UNDER SECTION 5 OF THE AWS CODE D1.1.
8. ALL COUPLING BOLTS TO BE ⅞"Ø, SAE J429 GRADE 8 BOLTS. (SAE J429 GRADE 5 IF GALVANIZED).

TYPICAL BRACKET w/
PILE ASSEMBLY DETAIL

STANDARD NEW CONSTRUCTION BRACKET CHART				
PART NUMBER	DIAMETER OF PILE	ALLOWABLE LOAD CAPACITY	BEARING PLATE SIZE	BRACKET SLEEVE AND LENGTH
4074	2 3/8"	24.2 KIPS	PL 5/8" x 8" x 0'-8	2 7/8"Ø x 0'-8
4075	2 7/8"	20.6 KIPS	PL 5/8" x4" x 0'-8	3 1/2"Ø x 0'-10
4079	2 7/8"	36.5 KIPS	PL 5/8" x 8" x 0'-8	3 1/2"Ø x 0'-10
4076	3 1/2"	65.1 KIPS	PL 1" x 9" x 0'-9	2 7/8"Ø x 0'-10
4077	4 1/2"	75.8 KIPS	PL 1" x 9" x 0'-9	3 1/2"Ø x 0'-10
4078	5.563"	80 KIPS	PL 1" x 10" x 0'-10	4 1/2"Ø x 0'-10

NOTE:
BRACKET SLEEVES FOR 3 1/2"Ø, 4 1/2"Ø & 5.563"Ø PILES FIT INSIDE PILE SHAFTS

NOTES:

1. POLYETHYLENE COPOLYMER THERMOPLASTIC COATING PER ICC-ES AC 228
2. REFERENCE PRE-CONSTRUCTION BRACKET CHART FOR ALLOWABLE LOAD CAPACITY OF BRACKET ONLY.
3. MANUFACTURER TO HAVE IN EFFECT INDUSTRY RECOGNIZED WRITTEN QUALITY CONTROL AND ASSURANCE FOR ALL MATERIALS AND MANUFACTURING PROCESSES.
4. MANUFACTURER SHALL BE ISO CERTIFIED.
5. ALL WELDING IS TO BE DONE BY WELDERS CERTIFIED UNDER SECTION 5 OF THE AWS CODE D1.1.
6. THE CAPACITY OF THE UNDERPINNING SYSTEM IS A FUNCTION OF MANY INDIVIDUAL ELEMENTS, INCLUDING THE CAPACITY OF THE FOUNDATION, BRACKET, PIER SHAFT, HELICAL PLATE, AND BEARING STRATA, AS WELL AS THE STRENGTH OF THE FOUNDATION BRACKET CONNECTION AND THE QUALITY OF THE INSTALLATION OF THE PILE. YOUR ACHIEVABLE CAPACITIES COULD BE HIGHER OR LOWER THAN THOSE LISTED DEPENDING ON THE ABOVE FACTORS.
7. SEE ICC-ES EVALUATION REPORT ESR-1854 AND RAM JACK ENGINEERING HANDBOOK FOR ALLOWABLE VALUES AND/OR CONDITIONS OF USE CONCERNING MATERIAL PRESENTED IN THIS DOCUMENT.
